

WHAT IS PREVENTION?

The promotion of a way of life that discourages drug use through multiple strategies.

Why Prevention Works:

- Raises awareness of the dangers of drug use and the benefits of constructive behavior.
- Promotes good parenting skills and strengthens the family as the first defense against drug abuse.
- Builds academic skills to allow individuals the potential of developing into contributing members of society.
- Provides mentoring and positive role modeling for youth. Builds social skills to enable the development of strong self-image that leads to positive decisions.
- Mobilizes communities to establish environments enhancing positive personal development.
- Strengthens and supports policies that promote healthy lifestyles and changes community norms.
